Rund Casual

A tribute to the iconic designs and interiors of the 70s

Sustainability in focus

We select materials and develop designs with sustainability, disassembly, and recirculation in mind.

FSC®-certified

In all of our products, we use FSC®-certified wood - the mark of responsible forestry.

Detachable covers

All our products have detachable covers for easy maintenance.

Prioritizing recycled materials

Our fabrics are all made from or partly made from recycled materials.

OEKO-TEX®

All our fabrics and foam are OEKO-TEX® certified. OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances to ensure customer confidence and high product safety.

10 YEAR Warranty on frames

We offer a 10-year warranty on our frames, as we want to make sure that all our products have a prolonged lifespan.

Optimized for transport

Our designs and packaging are optimized to ensure minimized CO₂ emissions in relation to transport and storage.

Introduction

As conscious consumers, we all share the responsibility to reevaluate our habits. Choosing products we truly want to keep over time is the most powerful way to reduce resource use and pollution.

As a supplier of upholstered furniture, we are committed to creating designs that embrace longevity. Every material is carefully selected, and every detail is developed with sustainability, disassembly, and recirculation in mind.

Rund Casual is crafted to embody these principles - without compromise on functionality, comfort, quality, or aesthetics.

A tribute to the laid-back 70s

Rund Casual celebrates the relaxed style of the 1970s, when wall-to-wall carpets, soft textiles, and warm earthy tones defined interior living.

Created as a soft comfortable and easygoing design, Rund Casual embraces natural wrinkles and patina over time - they are not flaws, but part of the sofa's intended character.

To enhance its rounded, inviting form, we have curated a selection of textiles that give Rund Casual the perfect tactile friendliness and unique personality.

Designed today with tomorrow in mind

With removable, washable covers, it's easy to keep Rund Casual fresh and clean. Thanks to its modular construction, individual parts can be replaced if damaged - or swapped to refresh the look with a new color or fabric.

This thoughtful design extends the life of your sofa, making it a lasting investment for both your home and your economy - while reducing resource consumption.

Comfort shaped by design

Rund Casual is defined by its distinctive rounded arms and back, creating a soft and welcoming expression.

This modular sofa concept is designed to deliver comfort without the need for cushions. Yet, to personalize the seating experience and adapt it to different situations and body types, a curated selection of cushions is available - allowing you to create the perfect balance of comfort and support.

True sustainability begins with timeless design

True sustainability starts by creating an attractive design with timeless appeal. Rund Casual embodies this philosophy, drawing on the circle as a fundamental element to shape a characterful and classic expression.

At the same time, Rund Casual is conceived as a modular design, allowing you to create personalized configurations that seamlessly adapt to your lifestyle. It is a sofa made to grow with you - a valuable piece for your home, worth maintaining, refreshing, and ultimately passing on to the next generations.

Give back to Nature

In addition to using FSC®-certified wood, we contribute to the balance of the global ecosystem by planting more than 10.000 trees every year to compensate for our consumption of wood.

Upholstery parts

Sustainability profile

Rund Casual is designed for a long life cycle, which is one of the primary intentions of our design philosophy.

- Strong and durable components in a design optimized for easy maintenance.
- All parts can be individually renewed if worn out or in case of damaging accidents.
- The detachable, washable covers are fitted with velcro that enable quick removal and precise reassembly, ensuring that the sofa remains presentable over time.
- We offer a 10-year warranty on our frames.

Optimized for transportation

The flat package design ensures minimized CO₂ emissions in relation to transport and storage, as it reduces the total volume of the items. Smaller packages also mean more convenient handling and thus less risk of damage during transport, as well as it makes it easier to install a sofa in, for instance, compact apartment buildings.

Materials

All materials are carefully selected in respect of overall quality and sustainability profile of the product.

- Which materials do we have available?
- How is it produced and with which environmental impact?
- Can the material be reused or upcycled?
- Which materials meet our expectations in terms of aesthetics, comfort, and durability?

Disassembly, recycling & waste management

The sofa is designed as individual components, which allow for separation of the sofa to ensure materials can be sorted into recyclable parts and waste.

The combinations

The combinations

P1N | 73 x 73 cm

P2N | 96 x 73 cm

77E | 73 x 97 cm

97E | 96 x 97 cm

A1L | 123 x 97 cm

A1H | 123 x 97 cm

A2L | 194 x 97 cm

A2H | 194 x 97 cm
